LEATHER INFORMATION

ANILINE LEATHER

The most natural-looking type of leather.

- Aniline leather is also referred to as vintage leather, naked leather or pull up leather.
- Aniline leather is comfortable and soft to touch. Since it retains all the unique markings and characteristics of the hide, each piece is different from any other one.

SEMI-ANILINE LEATHER

Semi -Aniline Leather is a corrected leather giving it a richer colour than the Aniline leather making it look more natural.

- Semi-aniline leather also has a thin protective coating that it does not stain as easily as the aniline leather.
- This leather is recommended for being kid and pet friendly.

CORRECTED GRAIN LEATHER

The corrected grain leather is considered as durable as full-grain leather, but the buffing of the surface removes the natural softness.

SPLIT LEATHER

Split leather is often used to make suede. Split leather can also be embossed with an artificial grain pattern and used to make inexpensive pigmented leather. Split leather is not as strong as the other leathers mentioned above.

FABRIC INFORMATION

Our Fabric range is made from Polyester which is one of the most widely-produced fabrics in the world. It is durable, affordable and easy to care for.

Liqueur, Wine drinks, Coffee, Tea and Milk:

- Use a dry, clean cloth to remove the matter that has not been absorbed. Dampen the stain and rub gently with cleaning fluid (Available from your furniture stockist), rinse thoroughly and finally, when dry, brush the fabric with a soft brush.

Pen, Ink, Cosmetic, Shoe-polish, Oil and Grease:

- Dampen the stain with warm water and then rub gently with cleaning fluid, rinse thoroughly and finally, when dry, brush the fabric with a soft brush.

Stubborn Stain / Ball Pen Mark:

- Use a cleaning fluid, dampen a cloth with the solution and follow the procedure described as above.
